

# Fire Plan Tips

- Find or draw the layout of your home. Each floor should have its own escape plan.
- Use a copy of the original blueprint or create your own.
- Identify all the:
  - Doors
  - Windows
  - Smoke detectors
- Identify two different ways to exit each room in the event of a fire.
- Choose a place outside of the house for everyone to meet in the event of a fire.
- Go over the escape plan with everyone in the family.
- You may want to display your escape plan to help everyone remember!

Visit the National Fire Protection Association at [www.nfpa.org](http://www.nfpa.org) for more information.
