

Vending Machine Tips

There are many types of vending machines, but there are similar steps you take to use any one.

- Determine whether the machine accepts bills and/or coins.
- Locate the item you wish to purchase.
- Locate the price.
 - In machines with **items that all cost the same amount**, the price will be listed near the area you deposit money.
 - In machines with **items that cost different amounts**, the prices will likely be listed under or near each item.
- Count out the correct amount of money.
 - If you do not have exact change, deposit bills and/or coins over the item price.
 - Take your change from the machine.
