

Check Receipt Tips

After you make a purchase, it's a good idea to **check your receipt** to make sure you paid the correct amount. Move away from the cash register and locate a “low traffic” area. You don't want to be in the way of other customers!

- Count how many items you purchased and make sure it matches how many items you paid for.
- Were any items double scanned?
- Did you receive the sale price on the correct items?
- Check to make sure that there are no unexpected charges.
- If you used coupons, check to make sure that they are listed on the receipt.
